Offense / Incident Narrative

I was contacted at about 2150 hours, on 11-01-2021, by the Missouri Information Analysis Center and was advised the Jefferson City Fire Department was requesting assistance with an investigation at 1621 East Elm Street, Jefferson City.

I arrived at about 2224 hours, on 11-01-2021, and was met by members of the fire department, who had secured the scene.

The weather was 40 degrees, 86% humidity, calm winds with overcast skies.

FIRE SCENE

This fire occurred to a one-level, wood frame, commercial structure resting on a slab foundation. The front of the structure faced in a westerly direction. The exterior walls were covered with brick veneer siding, while the combination hip and flat roof was covered with asphalt shingles.

The electrical service was in operation at the time of the fire with the service being supplied by underground lines to the service entrance located on the south side of the structure. The service entrance was clear of fire damage and was eliminated as a possible cause of the fire.

Through my fire scene investigation and subsequent interviews, this fire was classified as undetermined.

Exterior Examination

A detailed and systematic examination was conducted of the exterior of the structure. Please refer to the attached photographs for documentation of site specific examinations and findings.

The roof was found collapsed and consumed. The exterior walls showed no fire damage.

Interior Examination

A detailed and systematic examination was conducted of the interior of the structure. Please refer to the attached photographs for documentation of site specific examinations and findings.

The interior examination showed very minor fire damage to the interior portions of the structure. It was determined this fire damage was caused by fall down burning from the attic level.

The ceiling covering, ceiling joists, rafters and roof had collapsed into the interior portion of the structure. The burning debris from the collapsing roof caused the fire damage within the interior portion of the structure. No evidence of fire origin was found within the structure.

It could not be eliminated that this fire originated on the roof or within the attic portion of the structure. Air handling units were located in the middle portion of the roof and along the north and south portions

--------------------------------	------------------	---------------------------	---------------------

of the roof from the east to the west.

The air handling units had collapsed into the structure and could not be examined due to their inaccessibility.

It should be noted, the fire department was still conducting firefighting operations when I returned to the scene on 11-02-2021.

Conclusion

Due to the amount of fire damage sustained and the inaccessibility of the air handling units, no factual determination could be rendered as to an exact cause for this fire. The cause of this fire is therefore listed as undetermined.

FIRE DEPT INFO

I made contact with Jefferson City Fire Department Fire Chief Matt Schofield when I arrived at the scene. Chief Schofield said the fire department received a call of a structure fire at about 2051 hours.

Chief Schofield said the first arriving engine reported the southern portion of the roof was collapsing into the structure. He said due to the amount of fire found to the roofing system, entry was not made into the structure by the fire department. He said the fire attack was defensive. He said he did not plan on firefighters entering the structure at any time and the fire attack would stay defensive.

Chief Schofield said he was told by the Department of Natural Resources, Environmental Division the interior portion of the structure is not safe due to the amount of computers and components inside the building. He said for this reason also, he was not allowing anyone to enter the structure.

Chief Schofield said a passerby on Highway 50 called 911 and said they saw fire on the roof of the building.

Chief Schofield said due to this property being leased by the State of Missouri and the large property loss involved, he requested an investigation to take place.

Chief Schofield had nothing further to add to this statement.

INTERVIEW JEFFREY WANN

I interviewed Jeffrey Wann, Chief Information Officer for the Office of Administration – Information Technology Division at the scene. The following is a summary of that interview.

Jeffrey Wann said OA-ITSD was housed within this building. He said OA-ITSD was in this building working for the Department of Social Services. He said the building is owned by Bernard Groner and leased by the State of Missouri.

Jeffrey Wann said no one was inside the building at the time of the fire. He said a power surge had occurred at the building at about 8:00 am, this morning. He said he did not have any idea of how this fire would have started.

Jeffrey Wann had nothing further to add to this statement and the interview was concluded.
